

Kailash Purohit

Dehradun , India | purohitkailash513@gmail.com | +91 7668754523 | [github](#) | [linkedin](#)

SUMMARY

- Results-driven Computer Science graduate with hands-on experience in AI and software development projects. Proficient in Java script , Python, C++, SQL, and fundamental computer science concepts including OOPS and DBMS. Eager to contribute as a Software developer Engineer or AI/ML Engineer in a growth-oriented organization.

ACADEMIC DETAILS

Year	Degree/Exam	Institute	GPA / Marks
2026	B.Tech (CSE)	Graphic Era Hill University,Dehradun	7.5 CGPA
2022	Class XII (CBSE)	DAV Public School	70%
2020	Class X (CBSE)	DAV Public School	89%

TECHNICAL SKILLS

- **Languages:** C++ , Python ,JavaScript, C , SQL
- **Frontend:** JavaScript , HTML , CSS
- **Concepts:** DBMS , OOPS , PLSQL
- **Cloud Platform :** Amazon Web Services (Data engineering And Data Analytics)
- **Devops :** CI/CD Pipeline , Basic idea of Jenkins , Docker , Kubernetes , Prometheus ,(Git/Github)

PROJECTS

AI Chatbot Using Neural Networks

Python | Streamlit | Scikit-learn | NLP | TF-IDF

- Developed an intelligent AI chatbot using Natural Language Processing (NLP) and Neural Networks to understand user intents and generate context-aware responses for FAQs, weather updates, and general queries.
- Implemented TF-IDF vectorization and MLPClassifier-based intent classification, enabling accurate query processing, real-time interactions, and a user-friendly web interface deployed using Streamlit.

Loan Eligibility Predictor

Python | Scikit-learn | Pandas | Numpy | Streamlit

- Achieved 91% classification accuracy with a Random Forest Classifier; applied label encoding and Standard Scaler Pre processing on structured financial data.
- Deployed as an interactive Streamlit web application for real-time loan eligibility assessment.

Digit Recognition Neural Network

Python | TensorFlow/Keras | NumPy | MNIST

- Architected a handwritten digit recognition system with CNN-based image classification, leveraging the MNIST dataset for automated recognition of digits from input images.
- Implemented image preprocessing and inference pipelines using TensorFlow, Keras, and OpenCV, delivering high-accuracy real-time digit prediction and visualization.

Hospital Management System

HTML | CSS | JavaScript | MySQL

- Developed a web-based hospital management system to streamline patient registration, appointment scheduling, doctor management, and medical record maintenance through a centralized platform.
- Engineered secure database-driven modules for patient information, billing, and administrative operations using PHP and MySQL, improving data accessibility and operational efficiency.

CERTIFICATIONS

- **Salesforce Developer Certification** — SmartBridge Salesforce AICTE (May 2025 - Jul 2025)
- **Google Cloud Computing Foundations** — NPTEL SWANYAM (Aug 2025 - Oct 2025)
